

PV-ezRack PostMount 2, 3 and 4

The Universal Adjustable Pole Mount Solution

Cleenergy's PV-ezRack PostMount delivers flexible, effective and durable designs to mount 2, 3 or 4 panels per pole. Our PostMount systems are very high quality products designed to save you time and money on site.

All Cleenergy PV-ezRack PostMount systems use our patented PV-ezRack rails ensuring strength, flexibility and ease of installation. The innovative adjustable angle cap enables the angle to be easily and quickly adjusted from 0 to 60 degree.

Specifications

Installation Site:	Ground
System Tilt Angle:	Adjustable (from 0° to 60°)
Max. Building Height:	Up to 20m
Wind Load:	42m/s
Applicable Module:	Framed
Module Orientation:	Landscape (for PostMount 3) Portrait (for PostMount 2, 4)
Post Height:	1.4m above ground
Ground fixation:	Concrete burying (1 to 1.2m by 300 to 600mm increments)
Material:	Anodised aluminium Stainless steel
Warranty:	10 years*

Key Benefits

Easy Installation

Patented rail, Z-module and unique adjustable cap eliminate the need for onsite cutting, making the PV installation time and cost efficient.

Great Compatibility

Designed as a universal mounting system, PV-ezRack PostMount is compatible with most of the major framed PV modules on the market.

Great Adaptability

The innovative steel cap and support pole allow the angle to be adjusted according to the local geographical position to maximize the generating efficiency.

High Quality

Strict quality control over materials and finished products ensure optimum strength and long life for your installation.

Key Components

Adjustable steel cap

The innovative adjustable steel cap allows you to tilt the panels to the optimum angle, maximising the energy output of your system at your location.

PV-ezRack Light Rail

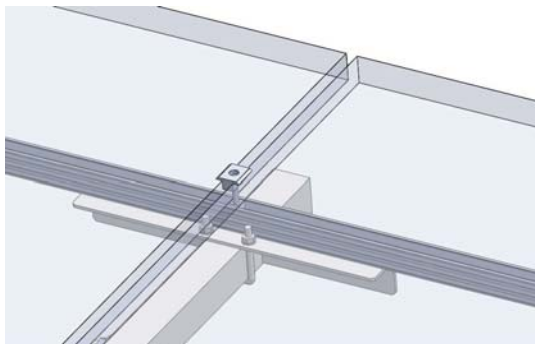

The patented PV-ezRack light rail is designed with top button mounting using Z-modules. The lower rail mounting is used to attach the rail to the PostMount master tube while the top rail mounting is used for clamps to hold the solar panels.

Clamps

With our Z-module technology, our clamps can securely fix the PV modules directly to the rail. Clamp sizes from 28 to 57mm ensure PV-ezRack is compatible with all the major framed panels on the market.

Assembly Illustration

Every size of panels can be mounted using clamps and Z-module.

The adjustable steel cap makes Cleenergy PostMount quick and easy to install.
